

## 9 Designs - 6 Widths - 4 Heights

It's easy to be taken in by the beautiful fire of a Galaxy fireplace at first glance, so we've designed the whole series around just that to ensure that the beautiful fire remains the focal point no matter where you are in the room.

Whether you're adding a grand single-sided fireplace to your room or using a multi-sided fireplace as a divider to help break up an open concept layout, you have nine different design configurations, in six different widths and four different heights, to help find the perfect fireplace for the space.

Create Beautiful Reflections That Look Different From Every Angle

Putting mirrors inside a firebox may seem like an unexpected choice,
but it truly can take the experience of a beautiful fire to a whole new level.
The mirrors reflect the flames, driftwood, media and LED lights over and over and over again, creating a look that is different from wherever you are within the room.

You can control the amount of reflections depending on which side of the mirrors you use. There is the more subtle reflective side, or the opposite side which is highly reflective (see photo to the left), creating endless iterations and a firebox full of flames.

The driftwood and flame reflections fill up the firebox when paired with the optional mirrored panels, and the LED lights can change the look of the Crystal glass media to any color you are in the mood for.

Any High-Definition Image Can Be Used All we need is an image ( 300 DPI or higher) and we can customize the interior of your fireplace with whatever look you desire.

Create eye-catching interiors that can be easily changed out if you decide you'd like to refresh the look at a later date.

## Create A One-Of-A-Kind Interior

Taking customization one step further, you can now put virtually anything you want inside your fireplace by printing the image of your choice onto interior glass panels.

The design potential is limitless to create a one-of-a-kind interior using artistic scenes, landscapes, business names or logos and more.

It's also a great way to match the exterior finishing
materials such as brick, marble, tile or stone and have a seamless transition to the interior firebox with quick a and easy installation.

The Envision panels can also be used on the exterior wall as a
creative finishing material.
Not available for four-sided or round fireplaces

## Driftwood Log Set-Optionter Bring A Little Touch of The.autidel Inside

## Beautiful Attention To Detail

The ribbon burner of the Galaxy fireplace may seem more contemporary at first thought, but when you add in the natural stone and a driftwood log set, you get the perfect blend of traditional and modern styles and a true classic, timeless look.

Shown above with the optional Envision interior panel, you feel like you are looking directly through the fireplace to a beautiful seascape sunset right outside your back door. The slight sheen to the panel creates subtle reflections that look different from every angle of the room.

## Finishing Guidelines

Combustible finishing materials may cover this Combustible finishing materials may
area right up to the fireplace opening

Note: Never overlap glass with any
of the finishing materials
Note: Never overlap glass with any
of the finishing materials

## $\qquad$

this

Minimum of 6" [152mm] clearance required from the top of the fireplace to any combustible framing

Non-combustible backer cement board must be in this area. Minimum of 7" [178 mm] from top of the fireplace for ease of attachment Placement of combustible mantel and/or hearth may be up to the fireplace opening
our control access locations
are provided on every fireplace for easy maintenance and service

Access with a removable panel in your finishing materials
in one of three locations on the fireplace; or if you desire a truly clean look, you can cover them all up and gain access from the interior of the firebox

## Flexibility To Create The Look You Want

How you finish the area off around the fireplace will increase its impact on the space and reflect who you are. Whether your taste is more subtle and you prefer the simplistic details of a clean modern look, or you appreciate the juxtaposition of combining natural with industrial materials, or you like to push the envelope using unexpected artistic twists, the Galaxy Series was designed with minimal clearances to combustibles so you can get as creative as you'd like.

## Power vent Technology

Each fireplace in the Galaxy Series uses a power vent exhaust system, which allows for great installation flexibility as to where you can place the fireplace within the structure.

Each fireplace will vent off the top of the fireplace.* Whether the desired cap location is a vertical or side wall application, you have up to 110 feet and 11 elbows to plan your vent run with, allowing the fireplace to be right where you want it.

Both regular power vent or in-line options available.

Flexible Vent Runs

Up to 110 feet
Up to 11 elbows
Up to 6' down
For vent runs over 50' and/or 5+ elbows,
consult with Stellar Hearth directly

| Model | Flue | Outside Air |
| :---: | :---: | :---: |
| $3^{\prime}$ | $8^{\prime \prime}$ | $10^{\prime \prime}$ |
| $4^{\prime}$ | $8^{\prime \prime}$ | $10 "$ |
| $5^{\prime}$ | $8^{\prime \prime}$ | $10 \prime$ |
| $6^{\prime}$ | $10^{\prime \prime}$ | $10 "$ |
| $7{ }^{\prime}$ | $10^{\prime \prime}$ | $10^{\prime \prime}$ |
| $8^{\prime \prime}$ | $10^{\prime \prime}$ | $12 "$ |

* If venting is desired/necessary off the sides, back or bottom of the fireplace, consult with your

Stellar Hearth Products sales representative to have a full custom fireplace designed.

## Universal Intake Eo Exhaust Louver

The sleek design of the universal louver is a great option to use for the termination cap for both the exhaust and air intake when using an in-line power vent, or for the outside air intake.

## Features:

3' -7' use Louver-8 \& Louver-10
$8^{\prime}$ use Louver-12 (for Intake Air Only)
Flush Mount

- Properly sized to use either an $8^{\prime \prime}, 10^{\prime \prime}$ or $12^{\prime \prime}$ collar - UL Certified
- Aluminized Steel / Rain resistant

Fully insulated
Can be painted

The Galaxy Series ${ }^{\text {sum }}$

## Indoor Outdoor See-Through Fireplace

The thoughtful design of the Galaxy Indoor Outdoor See-Through Fireplace is a creative choice for those rooms in your home that face beautiful outdoor sceneries, porches, patios, or other shared spaces.

## Standard Features:

- Wide variety of sizes to choose from:

3' to 8' Wide and 2' or 3' High View
Beautiful ribbon burn
Safe-T-Touch Glass system
LED ember lights with remote control standard Crystal glass media standard
Commercial grade components
Co-linear direct vent system with choice of standard power vent system or in-line power vent system
Wall switch - easy access to turn on/off
Mechanical intake damper keeps the cold air out
Fully-insulated firebox base standard Stainless steel chassis

## All the great standard features of The Galaxy Series" and more -

The firebox chassis and decorative glass frames are constructed using durable stainless steel with a matte black painted finish.

Air-intake vents built-in underneath the opening on the exterior and screens designed to seamlessly blend in with the decorative glass frame.

A stainless steel flashing between the fireplace and framing on the exterior keeps the cold air out.

Designed with commercial grade components, the indoor outdoor see-through fireplace is built to withstand the outdoor elements.

## The Galaxy Series ${ }^{m m}$ Round Fireplace

Great for an open floor plan, the beautiful flames in the Galaxy Round fireplace can be seen from any location in the room.

## Standard Features:

## Available in two sizes:

3' Diameter X 2' High Glass
3' Diameter X 3' High Glass

- Fully round firebox and glass - Beautiful star ribbon burn Safe-T-Touch Glass system
LED ember lights with remote control standard
Crystal glass media standard
Commercial grade components
Co-linear direct vent system with choice of standard power vent system or in-line power vent system Wall switch - easy access to turn on/off Mechanical intake damper keeps the cold air out
Fully-insulated firebox base standard

- Additional colors of glass media
- Variety of natural stone choices
- Driftwood log set
- Universal intake and exhaust louvers

## Round

Specifications

NOTE:
The hood shall be supported at specific
locations using $1 / 4-20$ UNC threaded rods. See installation instructions for quantity and placement.
Temporary supports are provided for installation.

- If using an in-line power vent, use a - IN after the model number at time of order

It is important to refer to the installation and operating manual PRIOR to installation verify all measurements and clearances for your particular installation
and [millimeters]
Use UL approved B-Vent pipe and follow all manufacturer installation of the fireplace
Vent run approved up to $110^{\prime}$ with quantity of 11,90 degree
IMPORTANT: MINIMUM FRAMING DIMENSIONS ARE TO COMBUSTIBLES

100, 000 BTU's in a star ribbon burner create a firebox full of flames and is perfectly accented by the standard LED glass
media lights and Crystal glass media visit www.stellarhearth.com CAD \& BIM drawings for the Galaxy Series available at CADdetails.com and ARCAT.com

## See-Through

specifications

Left side view

If using an in-line power vent, use $a-I N$ after the model number at time of order
Fireplaces come standard with Crystal Glass Media. Optional colors and Natural Stone are available
It is important to refer to the installation and operating manual PRIOR to installation verify all measurements and clearances for your particular installation

- Air intake collar may be rotated to vent off the side, or from the bottom of the fireplace

Use UL approved B-Vent pipe and follow all manufacturer installation guidelines
Vent run approved up to $110^{\prime}$ with quantity of 11,90 degree elbows. $1^{\prime \prime}$ clearance to $B$-Vent must be maintained
IMPORTANT: MINIMUM FRAMING DIMENSIONS ARE TO COMBUSTIBLES WITH $1 / 2^{\prime \prime}$ CLEARANCE STANDOFFS IN PLACE

Bay
Specifications

The dimensions in green are the allowable finishing width and height required to fit the glass into the fireplace. Finishing materials must not overlap these dimension.

If using an in-line power vent, use a -IN after the model number at time of order
If using an in-line power vent, use a -IN after the model number at time of order
at an additional cost
It is important to refer to the installation and operating manual PRIOR to installation verify all measurements and clearances or your particular installation

Air intake collar may be rotated to vent off the side, or from the bottom of the fireplace
Use UL approved B-Vent pipe and follow all manufacturer installation guidelines
Vent run approved up to $110^{\prime}$ with quantity of 11,90 degree elbows. 1"clearance to B-Vent must be maintained
IMPORTANT: MINIMUM FRAMING DIMENSIONS ARE TO COMBUSTIBLES WITH $1 / 2^{\prime \prime}$ CLEARANCE STANDOFFS IN PLACE

Pier

## Specifications

The hood shall be supported at specific locations using $1 / 4-20$ UNC threaded rods See installation instructions for quantity and placement.
Temporary supports are provided for Tinstallation.

ACCESS PANEL
FRONT AND REAR
left side view

The dimensions in green are the allowable finishing width and height required to fit the glass into the fireplace. finishing materials must not overlap these dimension.

If using an in-line power vent, use a - IN after the model number at time of order
Fireplaces come standard with Crystal Glass Media. Optional colors and Natural Stone are available at an additional cost
It is important to refer to the installation and operating manual PRIOR to installation verify all measurements and clearances for your particular installation

- Air intake collar may be rotated to vent off the side, or from the bottom of the fireplac

Use UL approved B-Vent pipe and follow all manufacturer installation guidelines
Vent run approved up to $110^{\prime}$ with quantity of 11,90 degree elbows. 1 " clearance to $B$-Vent must be maintained
IMPORTANT: MINIMUM FRAMING DIMENSIONS ARE TO COMBUSTIBLES WITH $1 / 2^{\prime \prime}$ CLEARANCE STANDOFFS IN PLACE

## Left \& Right Corner

## Specifications

note: right corner schematic shown

Left side view

The dimensions in green are the allowable finishing width and height required to fit the glass into the fireplace. Finishing materials must not overlap these dimension.

- If using an in-line power vent, use a - IN after the model number at time of order

Fireplaces come standard with Crystal Glass Media. Optional colors and Natural Stone are available
at an additional cost
is important to refer to the
for your particular installation
Dimensions are in inches and [millimeters]
Air intake collar may be rotated to vent off the side, or from the bottom of the fireplace
Use UL approved B-Vent pipe and follow all manufacturer installation guidelines
Vent run approved up to $110^{\prime}$ with quantity of 11,90 degree elbows. 1"clearance to B-Vent must be maintained
IMPORTANT: MINIMUM FRAMING DIMENSIONS ARE TO COMBUSTIBLES WITH 1/2" CLEARANCE STANDOFFS IN PLACE

Four Sided
Specifications

The dimensions in green are the allowable finishing width and height required to fit the glass into the fireplace. nishing materials must not overlap these dimension.
using an in-line power vent, use a -IN after the model number at time of order
Fireplaces come standard with Crystal Glass Media. Optional colors and Natural Stone are available
at an additional cost
ins mal PRIOR to installation verify all measurements and clearances Dimensions are
Air intake collar may be rotated to vent off the side, or from the bottom of the fireplace
Use UL approved B-Vent pipe and follow all manufacturer installation guidelines
Vent run approved up to $110^{\prime}$ with quantity of 11,90 degree elbows. $1^{\prime \prime}$ clearance to $B$-Vent must be maintained
IMPORTANT: MINIMUM FRAMING DIMENSIONS ARE TO COMBUSTIBLES WITH $1 / 2^{\prime \prime}$ CLEARANCE STANDOFFS IN PLACE
